Comments concerning proposed rulemakings

Critical Infrastructure reporting - you all HAVE to make this much simpler to submit. The current 'process' is absolutely ridiculous, and quite frankly seems to be designed to PREVENT filing the report. There is no excuse for making the process so impossibly frustrating. Converting files to YOUR requirements, and having to have IT support (which not all entities have) to even begin to understand the process of converting to YOUR requirement? I spent 4 hours in a webinar, several more signing up, registering, applying for user/passwords, assigning users, granting permissions, attempting to submit the report, sending emails for help, only to have the format rejected. Ridiculous, folks.
