Comments concerning proposed rulemakings

The Commission needs to do far more than what is proposed to protect groundwater. Since the bulk of oil and gas drilling is in the Permian Basin which is entirely reliant on groundwater, protection of this vital, dwindling resource must be a priority. The Commission could try a lot harder. I realize you have to be cognizant of the power of the oil industry, but you have a duty to protect the citizens' drinking water before it's all contaminated.
