Comments concerning proposed rulemakings

Thank you for your work and efforts in regard to the proposed Rule Changes regarding Rule 8. As an operator, small business owner, and PISD school board trustee in a small Texas community while we have used science and common sense in the needed update to these rules, further possible detrimental changes to these rules with excessive burdening of small operators are unneeded. The RRC , including the district offices, have a successful track record of protecting ground water resources while enabling Texas energy producers to support our businesses, schools, and communities. Outside interest groups with few Texas ties in many cases, are offering little for the benefit of my community, my business, or Texas itself. Thank you for your work and resolve. Richard Beyea
President Remnant Energy
