Section 9.126 and 9.143 - I Support electronic actuators and engineered breakaways. Section 9.140 - I support that all cylinder cages be deemed adequate protection under 9.140 including forklift cylinders. Section 9.52 - I oppose the elimination of CTEP and continuing education for managers. The RRC should keep CTEP as continuing education especially since this training includes best practices nationwide and not confined to one state. Section 9.2 and 9.55 - I support allowing the PERC Dispensing Propane Safely Training to be used in place of the RRC Exam; however, I oppose the rules for outside instructors that are excessive and believe that the individuals should be able follow the PERC guidelines to receive credit.
